

ESP32 Reflex Course Demo

This is the complete student ZIP for the Reflex Guard Course 1 demo.

Files

- `reflexcoursedemo.ino` - ESP32 firmware for the course demo.
- `MonogateDashboard.exe` - student dashboard for viewing live ESP32 serial data.
- `schematic.pdf` - reference schematic.
- `wiring-diagram.pdf` - direct pin-to-component wiring map.
- `BOM.pdf` - bill of materials.

Quick Start

1. Open `reflexcoursedemo.ino` in the Arduino IDE. 2. Select your ESP32 board and upload the sketch. 3. Double-click `MonogateDashboard.exe`. 4. Turn the potentiometer and press the button while watching the dashboard.

Safety: unplug USB before moving jumper wires. If you smell anything hot or see smoke, unplug the board immediately and check the wiring before powering it again.
